Chicago Site Project

Now that you have learned about some of Chicago’s neighborhoods you will become the expert on one place in the Chicago area. The requirements for this project are as follows:

1. Research your Chicago site and write a 1-2 page report.
2. Create a “visual” to be shared during an oral presentation to the class. This may be a PowerPoint demonstration, model, diorama, display board, etc.
3. Prepare and practice an oral presentation about your site.

You may choose from the list of sites attached. If there is a site you are interested in that is not on the list, just get your teacher’s permission.

You may begin your search for information using the links on the Student Page of this web-site. A good idea may be to visit your site, take notes and photos, collect available pamphlets, and make a day of it.

This should be a good learning experience for you. Please be aware that more emphasis will be placed on the information learned than on the aesthetics of the project. Have fun!
