Module C
Maps and Mileage
Extension Activity

Mapquest and Rand McNally are two of the newer ways to check for driving distance. Prior to this type of technology, people determined distance by using a Map Scale.

(1.) Obtain a copy a road map for the state of Illinois.

(2.) Using your hometown as a starting point, use the Map Scale to find the distance to Springfield.

(3.) Using the information from Step #2, calculate the total round trip distance.

(4.) Add this documentation to your project portfolio.
